

e-Business W@tch 2006 Hospital Activities Workshop

Hospital information system integration / ICT impact on hospitals

Malaga, 10th May 2006

Time	Wednesday, 10 th May 2006, 11:00 – 13:00 hrs
Location & Venue	Malaga, Spain, Trade Fairs and Congress Centre Strategic Seminar at the eHealth High Level Conference and Exhibition http://www.ehealthconference2006.org
Chair	Georgios Karageorgos, European Commission, General Directorate Enterprise and Industry
Background and objectives	<p><i>e-Business W@tch</i> is an observatory implemented by the European Commission, <i>General Directorate Enterprise and Industry</i>, in late 2001. Its mission is to monitor and assess the uptake and use of Information and Communication Technology (ICT) among enterprises in the European Union and beyond, and to analyse policy implications. In 2006, hospital activities were selected as one of ten economic sectors for quantitative and qualitative analysis.</p> <p>At the Strategic Seminar, <i>e-Business W@tch</i> will discuss three issues:</p> <ol style="list-style-type: none"> 1) first findings from the <i>e-Business W@tch</i> 2006, 2) integration of hospital information systems, 3) the impact of ICT on the changing role of hospitals in health care. <p><i>e-Business W@tch</i> and the European Commission will invite decision makers from eHealth manufacturers and providers, hospital management and public administration to attend this seminar for an in-depth debate with the <i>e-Business W@tch</i> study team.</p>
